The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status

Application/Control Number: 09/828,048

Art Unit: 1755

Applicant's election with traverse of group I, claims 1-11 and 13 wherein the elected species is that of claim 5 in Paper No. 3 is acknowledged. The traversal is on the ground(s) that the restriction between group I and II is not correct because they should be considered under Combination-Subcombination. This is not found persuasive because the inventions of group I and II are best described in terms of product and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product, a film of silicon, oxygen and carbon; could be formed by a process of deposition from a liquid suspension.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 10, 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4737379.

The instant claims are drawn to coatings (construed as a deposited film) comprising compounds of silicon, oxygen and carbon (silicon oxycarbide). Claim 10 limits the coatings to those including more than one layer where at least one layer is said compound. Claim 11 requires that the coating of claim 1 is graded through its thickness. Page 6, line 19 through page

Application/Control Number: 09/828,048

Art Unit: 1755

7, line 12; of the specification defines "graded" as having a composition that varies in a continuous or step manner through its thickness.

US Patent 4737379 teaches films comprising SiC_xO_y wherein x and y are from 0 to 2. Column 16, lines 65+ teach that such layer may be deposited upon an underlayer of differing composition. That deposition forms a multilayer film having a composition that varies in a step manner through the thickness of the film.

Applicant's attention is directed to the remaining documents cited by examiner that disclose and claim similar films.

The mere failure of a reference to disclose all the advantages asserted by applicant is no a substitute for actual differences in properties. In re DeBlauwe, 222 USPQ 191. An apparently old composition cannot be converted into an unobvious one simply by the discovery of a characteristic one cannot glean form the cited prior art. Titanium Metals Corp. v. Banner, 227 USPQ 773.

Accordingly, the burden of proof is upon applicant to show that the instantly claimed subject matter is different form and unobvious over that taught by the prior art relied upon. In re Brown, 173 USPQ 685, 689; In re Best, 195 USPQ 430; In re Marosi, 21 USPQ 289, 293.

Any evidence to be presented under 37 C.F.R. 1.131 or 1.132 should be submitted before final rejection in order to be considered timely. It is anticipated that the next office action will be a final rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M Brunsman whose telephone number is 703-308-3454. The examiner can normally be reached on M, W, F, Sa; 6:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell can be reached on 703-308-3823. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
